Attn: ORLOR-R/Ron Waller
Louisville, KY 40201

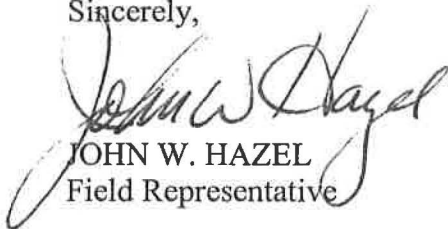

Dear Mr. Waller:

Please make note of the following corrections in the website addresses in the gypsy moth trapping program summary letter dated February 13, 2002. The STS web site should be: <http://www.ento.vt.edu/STS/>. Please make sure the "STS" in the address is capitalized.

The GM Digest website should be: <http://fhpr8.srs.fs.fed.us/wv/gmdigest/gmdigest.html>. Please note the addition of the extra "gmdigest" in the address.

I apologize for any inconvenience this may have caused. If you have any questions, please call Karen Felton at (304) 285-1556.

Sincerely,

JOHN W. HAZEL
Field Representative

Mr. Ron Waller
U.S. Army Corps of Engineers
Louisville District
P.O. Box 59
Attn: ORLOR-R/Ron Waller
Louisville, KY 40201

Dear Mr. Waller:

Summaries of the 1983-2001 gypsy moth trapping program conducted at four Army Corps of Engineers sites within the Louisville District are enclosed for your information (Table 1). Also enclosed are maps showing the trap locations at each site (Figures 1a-1d). The purpose of the trapping program is to monitor low-level gypsy moth populations and to help determine when more intensive survey methods should be employed.

William H. Harsha Lake was the only Corps site to have an increase in male gypsy moths trapped in 2001. William H. Harsha Lake trapped 4 male moths compared to 2 moths in 2000. The other three sites had a slight decrease in moths trapped in 2001. Based on these results, gypsy moth populations will not impact the forest resources at these Corps sites in the immediate future.

Figure 2 shows the 2000 and 2001 Slow-the-Spread (STS) project trapping results in Ohio. Figures 3a-3d show the 2001 STS trapping results in vicinity of each Corps site. The STS trapping results indicated similar results in the vicinity of the Corps projects. Please visit the STS web site at <http://www.ento.vt.edu/sts/> for more information regarding the STS program.

It is important for Corps personnel continue looking for other gypsy moth life stages such as larvae, pupae and/or egg masses while performing their normal duties. Please visit our GM Digest web page at <http://fhpr8.srs.fs.fed.us/wv/gmdigest.html> for publications that can be helpful with the identification of these life stages, as well as a good resource for general gypsy moth information.

We would like to continue the trapping program at the same intensity in 2001. Thank you for your continued cooperation and if you have any questions regarding these results, please call Karen Felton at (304)285-1556.

Sincerely,

JOHN W. HAZEL
Field Representative
